

Case Study: Egypt Mill Website

The Client

Egypt Mill specialises in providing serviced accommodation, delicious restaurant food & drink, unforgettable weddings & events on a private floor.

Project Overview

Egypt Mill Hotel & Restaurant came to us with the fantastic opportunity to redesign and develop their existing website. They were in need of a new online platform that truly represented their impeccable class and style.

Summary

Working closely with managers Rob and Julie, we fine-tuned the design until it perfectly captured the history of the mill. We ensured the new website was also in keeping with today's modern design standards. Throughout the website development, we kept the user experience at the forefront, making it as easy as possible for them to get the information they need and book a room or time to eat.

Once the website was approved, we then created a fully editable CMS website using WordPress; where our customer could easily update text, images, menus and events.

Key Points:

Egypt Mill provides accommodation, food and drink and helps plan weddings and other events.

They came to us with the opportunity to redesign and develop a website.

Impact IT helped to fine-tune design ideas and came out with the perfect result.
